## EDUCATION

---

**High school** – Graduated, Makif T high school, Rishon Lezion. 1999 – 2011

**Bachelor's Degree** – Bachelor of Science in Computer Science, Holon Institute of Technology, Holon. 2017 - 2020

## SOFTWARE PROJECTS

---

### Online "Book Store" Client-Server – Java

- Developed the application in java, based on OOP principles, TCP/IP Protocol using MVC architecture, and unit tests.
- Using searching algorithms (KMP, Suffix tree) to search through data that use Strategy design pattern.
- The client can manage his online bookstore and get data from the server.
- GitHub Link: <https://github.com/Maorm2/Client-Server>

### Cost Management Server-side – Java

- Developed server-side using Apache Tomcat and Hibernate library for DB.
- The server-side functions as Rest API which connected to MySQL DB using MVC architecture and reflection.
- The client can connect from any device support internet – mobile, browser, etc., and manage his costs.
- GitHub Link: <https://github.com/Maorm2/CostManagement>

### Products Store – Node.js

- Developed the application with VS Code using the Express.js framework.
- The server-side functions as REST API which connected to MySQL DB using Sequelize library and MVC architecture.
- The client can manage the products using CRUD operations.
- GitHub Link: <https://github.com/Maorm2/products-store>

## SKILLS

---

- **Programming languages:** Java, Android, JavaScript (ES6), CSS3, HTML5, C.
- **Libraries/Frameworks:** Hibernate, JPA, Spring boot, Node.js, Express.js, React, Bootstrap.
- **IDE:** Eclipse, IntelliJ IDEA, Vs Code, Atom, Visual Studio, Android Studio.
- **DB:** MongoDB(mongoose), MySQL, Firebase.

## EMPLOYMENT

---
